

Linda Khuth

UX/UI Product Designer

khuth.linda@gmail.com · 339-440-6155 · [LinkedIn](#) · [Portfolio](#)

Summary

Product designer with 4+ years of experience owning end-to-end design across B2B SaaS and mobile platforms. Started in healthcare — that background shaped how I research, listen, and design for real people under real constraints. Comfortable building from 0 to 1: design systems, complex dashboards, internal tools, and marketing sites. Experienced working cross-functionally with engineering, product, and customer success teams in fast-paced startup environments.

Work Experience

Founding Product Designer, [MykroGrid](#)

May 2023 – Present

- Sole designer across 4+ platforms (Control Center, Client Dashboard, warehouse management, and admin tools) including a tablet-optimized system for field teams tracking hardware shipments and inventory, establishing design direction from the ground up for a clean-energy infrastructure startup.
- Led end-to-end redesign of MykroGrid's public marketing website, clarifying product offerings across three distinct audience segments — residential, institutional, and developer — and establishing the visual design system now used across all web properties.
- Designed Control Center, a mission-critical operations platform for engineers to monitor grid health, manage alerts, and track infrastructure performance in real time.
- Built end-to-end onboarding and operations tooling for Customer Success teams, streamlining client registration, payments, and engineer handoffs.
- Designed client-facing dashboard for monitoring smart meter activity, power usage, and transaction history.
- Established and maintain company-wide Figma design system (components, tokens, documentation) adopted across all internal products.
- Incorporate AI tools (Claude, ChatGPT, Figma AI) into the design workflow for brainstorming, UX copy, research synthesis, and rapid concept generation.

Product Designer, [IntelyEdu](#) / [IntelyCare](#)

July 2022 – December 2022

- Partnered with product and engineering to identify and resolve key usability friction points across the IntelyCare Edu platform through user research and usability testing.
- Designed high-fidelity concepts and interactive prototypes for a full website redesign, improving clarity of the company's service offering.
- Evaluated third-party tools for platform integration, documenting technical constraints and design implications for the product team.
- Produced marketing and campaign assets aligned with product and brand initiatives.

UX/UI Designer, Basha Works LLC

October 2021 – April 2022

- Facilitated stakeholder workshops to surface user needs, define product requirements, and map end-to-end user workflows for a 0-to-1 mobile product.
- Designed high-fidelity mobile interfaces and interactive prototypes that aligned engineering and stakeholders on product direction.
- Built a scalable component library to accelerate development and ensure design consistency across the mobile app.
- Collaborated closely with engineers through production handoff, bridging design intent and implementation.

Skills

Design: UX/UI Design, Interaction Design, Visual Design, Responsive & Mobile Design

Research: User Research, Usability Testing, Stakeholder Workshops, Heuristic Evaluation

Process: Wireframing, Prototyping, User Flows, Information Architecture, Design Systems

Tools: Figma (design systems, prototyping, component libraries), Adobe Creative Suite

Collaboration: Agile, Cross-functional Collaboration, Developer Handoff, Product Roadmapping

Education

Google UX Design Professional Certificate

Coursera, April 2021 – October 2022

B.A. Sports and Movement Science

Salem State University, 2014 – 2018
